This guide will teach you how to edit images in Photoshop Elements. As a side note: Photoshop Elements' program interface is similar to Lightroom, so the skills you learn here will be pretty useful in Lightroom as well. Using Photoshop Elements for Photography Let's start with simple basics. First we will open a raw photo and edit it. We will then learn how to

apply our edit and export the edited version. Importing images Import your photo using any of the following methods: Open the file from your hard drive via the File menu. If you have unprocessed RAW images, you will need to set the "Unprocessed Raw" option. menu. If you have unprocessed RAW images, you will need to set the "Unprocessed Raw" option. Upload the file to a service like Shutterfly or Microsoft Fine Art Portrait.

You can upload as many high-quality images to Shutterfly as your storage capacity allows you. Your computer should pick up the file as soon as it is added to your hard drive. Once picked up, it will become available to you within the software and you can open it like any other file. Alternatively, you can use a service such as Dropbox to sync your computer files with your phone or tablet for viewing/editing wherever you go. Note: Adobe does not give a guarantee that your raw file will be processed. While the "Add to catalog" option is fast, it does not guarantee that the file is added as part of the catalog. You should double check that the image is there. Editing photos As shown in the following screenshot: This is your standard adjustments dialog. Pep Guardiola has unleashed a scathing attack on Manchester City star Kevin De Bruyne in a new book in which he claims Manchester City's title rivals are now playing the "sport of poker" to reach the top. Guardiola's book, 'My Pep', was released in the United States on Tuesday.

According to the Mail On Sunday, Guardiola says the Belgian, who has been in phenomenal form for City this season, is playing poker to win matches and claims City has lost four crucial points from two potentially winning positions in 2016. The newspaper claim Guardiola has confirmed that he has been instructing the City players to adopt a "hidden hand" strategy to win games. Guardiola's arrival at City in July 2015 has been generally regarded as a success story, with the Spaniard becoming the club's first Champions League-winning manager, although some have questioned his unconventional methods and

style. Guardiola's early decisions to drop champions league winners Yaya Toure and Mario Balotelli have been cited by some fans as mistakes he regrets, although he rejected criticism of his decision to replace Toure in October and Balotelli a few months later. The book also claims that a final victory in Europe remains Guardiola's intention, with no player keeping secrets of City's Champions League ambitions.

Entries for a Blue Ribbon Drawing Contest

The winner of the recent "Fight For Air" art contest is listed in the Daily Record. His name is Rolando H. Velazquez and he lives at 235 N. 3rd St. in Kingsport, TN. I called him, and he said he's thrilled to win. Dude, I am from Kingsport! It's me! I know everyone who won and who didn't because I was just there for a week. I grew up in Kingsport, went to Kingsport High School, was the head of the "Senior Class of 1975," and was president of the Foreign and Sports Club. I still have memories of bumping into Bobby Benson during summer camp in Pigeon Forge in

a yellow outfit eating Chinese food on the porch of the White House Inn with my sister and Kevin. And I remember all the things I did at Kingsport High, along with all the great memories and people I met at that time. It's really a great town. Nice to read about "Classic City." About Me This blog is dedicated to the concept of finding the humor in a unique selection of cartoons and characters from the past. I've collected these characters and cartoon clips from all kinds of places, from time to time, and I can't resist sharing them with you. Enjoy!

Q: how to change DataGridView view's cell style for binding data source? I just have a DataGridView in a WinForm. I bind my data to the DataGridView via `DataGridView.DataSource = ds`; Now, I want to change my cell style, because it looks so ugly. I did:

```
DataGridView dgv = new DataGridView();
dgv.Style.BackColor =
System.Drawing.Color.LightGray;
```

But, it didn't work! I just saw a property called `CellStyle`, but it seems not suitable for a DataGridView. I did not understand it, as it's a UserControl. Any ideas?

A: DataGridViews do not have cell styles. You can customize the look by changing the cell's `ControlStyle`. Note that the `ControlStyles.UserPaint` is used for this purpose
